

The Difference in Fill and Finish

CellSeal[®] AF-500[™]

AUTOMATED FILL AND SEAL SYSTEM

Moving from concept to commercialization, the CellSeal AF-500 delivers the automation difference in a precision engineered, GMP compatible, fill-finish system. For cell and gene therapy developers and manufacturers, the AF-500 provides the path to scale up and standardization with:

- **Accuracy:** 99% fill accuracy
- **Productivity:** filling up to 400 vials per hour
- **Traceability:** detailed process parameters included in batch record and audit trail
- **Sterility:** suitable for Vapor Hydrogen Peroxide (VHP) sterilization
- **Versatility:** designed for a controlled environment; benchtop, biosafety cabinet, or isolator

The CellSeal AF-500, the difference in fill and finish performance. To learn more, contact your Cook Regentec representative.
