

Vital to growth

Expand your cells safely, consistently, and quickly

Stemulate™

POOLED HUMAN PLATELET LYSATE

TOOLS FOR BETTER CELL GROWTH

Safely

Stemulate human platelet lysate is the right choice for expanding human cells. Human-derived and heparin-free, Stemulate is made from human donor platelets obtained from AABB accredited/U.S. FDA registered blood centers and tested for infectious diseases using criteria for transfusable blood products. Stemulate is produced in an ISO 9001 certified, purpose-built facility.

Consistently

Large-batch production of Stemulate minimizes lot-to-lot variability. Plus, the reliable and consistent supply of human donor platelets helps ensure Stemulate will be there when you need it and at a price you can afford.

Quickly

Stemulate has been tested with multiple types of cells in vitro. These cells include mesenchymal stem cells (MSCs) from a variety of tissue sources (such as adipose, bone marrow, and placenta), endothelial colony forming cells, and fibroblasts. Using Stemulate at concentrations of 2%, 5%, and 10% supported cell proliferation at levels comparable to fetal bovine serum (FBS).¹

Stemulate™

POOLED HUMAN PLATELET LYSATE

- Ethically sourced
- No heparin required
- Stable and competitive pricing

Reference Part Number

Clinical Grade

Stemulate 100 mL	PL-SP-100
Stemulate 500 mL	PL-SP-500

Research Grade

Stemulate 100 mL	PL-NH-100
Stemulate 500 mL	PL-NH-500

Orders are shipped in controlled-temperature containers. Some products or part numbers may not be available in all markets. Contact Customer Service for details.
